

Hello,

I've just installed abiword and am using Mac OS0.3.9. The font spacing is off. t leaves gaps. Also when I enlarge or reduce the size of the page spacing on the font is off. Some of the letters don't look right either. When I preview to print, some letters turn into weird characters.

What's going on and how do I fix it?

I'm attaching a screen shot of what the problem looks like.

Thanks.

Brian
